Weekly Heat-related Illness Surveillance Report

July 31, 2012

Reporting for 07/24/12 through 07/30/12

This information is used to make a Heat Advisory but is not a Heat Advisory in itself.

National Weather Service Forecast: No hazardous weather forecasted

Heat Advisories Declared During the Previous Week: 2

Total Heat Advisories Declared This Year: 14

Heat Indexes are calculated for temperatures above 80°F with humidity of 43% or greater.

Date	Number of Chief Complaints Regarding Heat-related Illnesses State of Maryland
July 24	31
July 25	30
July 26	41
July 27	49
July 28	37
July 29	28
July 30	30

*Note: ESSENCE chief complaint query contains the following terms: hyperthermia, heat, dehydration, and sun burn

There were no chief complaint clusters identified during the week.

Total Number of Confirmed Heat-related Deaths to Date	Jurisdiction[#]	Age Group	Sex
34	Montgomery County	45-64 Years Old	Male

	Montgomery County*	65+ Years Old	Male

[#]Refers to the jurisdiction where the heat-related death occurred

*Deaths that did not occur during the June 29 – July 8 complex heat emergency

There have been a total of 34 heat-related deaths thus far in 2012.

Heat Advisory criteria: The National Weather Service will issue a Heat Advisory when the heat index value is expected to reach 105 to 109 degrees within the next 12 to 24 hours. A Heat Advisory may be issued for lower criteria if it is early in the season or during a multi-day heat wave. NWS will issue an Excessive Heat Warning when the heat index value is expected to reach or exceed 110 degrees within the next 12 to 24 hours. An Excessive Heat Warning may be issued for lower criteria if it is early in the season or during a multi-day heat wave.

Note: The heat report will be released on Tuesdays, with the reporting period being the previous Tuesday through Monday. The results from the query used in ESSENCE to track heat-related illnesses may be an overestimation of the actual burden of illness related to the hot weather. This overestimation is due to the nature of the query, which includes the term dehydration, a condition that may be caused by factors other than heat. OP&R will be issuing heat reports through the beginning of September 2012.
